PROFESSIONAL SUMMARY

Full-stack developer and operations leader with 6+ years across software delivery, AI products, and business operations. Architected and deployed 9+ production systems end to end, including a computer-vision video platform, multi-tenant SaaS, AI automation tools, and live e-commerce stores, handling frontend, backend, database, auth, APIs, and deployment without a team behind me. Also managed 30+ people and scaled monthly net sales from $40,000 to $200,000.

KEY HIGHLIGHTS

- **9+ products:** shipped from scratch and running in production for real businesses.
- **$40K → $200K:** monthly net sales (5x growth) driven as Operations Manager.
- **30+ person team:** managed across hiring, training, KPI tracking, and workflow design.
- **AI/LLM specialist:** Claude and OpenAI integrations, RAG systems, custom chatbots, and autonomous agents for clients and my own products.
- **Multi-platform delivery:** single codebases shipping as web, Electron desktop, and Capacitor mobile.
- **Computer vision & video:** RallyCam cuts highlight clips on site and delivers them to players in about 8 seconds.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, SQL, HTML/CSS

Frontend: React, Next.js, Tailwind CSS, Vite, Responsive Design, PWA / Offline-First

Backend & Data: Node.js, Express, Supabase, PostgreSQL, SQLite, REST APIs, JWT/OAuth (PKCE), WebSockets, S3/R2 Storage, Multi-Tenant, RBAC, Rate Limiting

AI & Automation: Claude API, OpenAI API, AI Chatbots, RAG Systems, Make, Zapier, n8n, Google Apps Script

Video, Vision & Edge: ffmpeg, RTSP/ONVIF IP Cameras, RTMP Live Streaming, TensorFlow.js Pose Detection, Camera Calibration, Edge Agents, Hardware Encoding (QSV/NVENC)

DevOps & Platforms: Git, Vercel, Railway, Netlify, Cloudflare, Docker, Electron, Capacitor, Android, Linux, Automated Testing, Backups & DR, CSP

Integrations: Facebook Graph API, Messenger, Stripe, GCash, Xendit, Google OAuth, Brevo, Resend, Airtable, Socket.io, Google Places

Business Tools: Google Sheets, Docs & Drive, Excel, Word, GoHighLevel, HubSpot, Notion, Slack, Canva, Calendly, Loom

Leadership: Team Management (30+), Operations Strategy, KPI Tracking, Project Management, Client Relations, Revenue Growth

PROFESSIONAL EXPERIENCE

Founder / Full-Stack Developer | DLVASolutions / ForgeAI *2024 – Present*

- Founded and run a development agency delivering websites, web apps, and automation systems across e-commerce, hospitality, and services.
- Built and shipped 9+ products from scratch, including RallyCam (computer-vision video platform), WhiteLabelAI (multi-tenant SaaS), Dark Sync (web/desktop/mobile management system), and multiple live e-commerce stores.
- Built RallyCam, a computer-vision court recording and booking platform live for pickleball clubs in the Philippines, spanning an on-site edge agent, a cloud API, a React PWA, and online payments.
- Launched ForgeAI, a cold-email outreach platform that sources leads by city and business type, scrapes each prospect's website, generates personalized copy via the Claude API, and runs follow-up sequences.
- Own the full delivery lifecycle: discovery and scoping, UI/UX, architecture, development, deployment, and maintenance of live systems.

Operations Manager | Pink Models Agency *2024 – 2025*

- Managed daily operations for a team of 30+, covering hiring, onboarding, training, and performance management.
- Scaled monthly net sales from $40,000 to $200,000 (5x growth) through workflow redesign, KPI tracking, and tighter operational discipline.

- Built internal systems and reporting processes that gave leadership clear visibility into performance metrics and bottlenecks.

Project Manager | Taskapp AI *2021 – 2024*

- Ran talent-sourcing projects end to end, from requirements gathering through final delivery.
- Designed and managed candidate pipelines, verification workflows, and coordinated multi-channel email outreach campaigns.
- Served as primary client contact, maintaining data accuracy and consistently hitting delivery deadlines across concurrent projects.

AI Client Solutions Manager | Adaya AI *2021 – 2023*

- Worked directly with business clients to design and deploy custom AI chatbots and virtual assistants.
- Built and structured knowledge bases, trained and fine-tuned model responses, and validated that each deployment solved the client's actual operational problem.
- Managed client onboarding and provided ongoing technical support and iteration post-launch.

Customer Service Representative | Appointment Setting (freelance, various clients) *2020 – 2021*

- Handled high-volume inbound and outbound calls, booking appointments and resolving customer issues while maintaining detailed records.
- Developed the communication discipline and organizational habits that carried into later client-facing and leadership roles.

SELECTED PROJECTS

RallyCam | *Computer Vision · Video Platform* rallycam.ph
Court recording for pickleball clubs. A player scans a QR sign, taps record, and their best rally reaches their phone in about 8 seconds. An on-site mini PC keeps a rolling 4-hour buffer and cuts clips locally, so only the finished highlight is uploaded. Six products on one platform: recording, booking with payments, an open-play queue, dashboards, and a courtside tablet.
Stack: React, Node.js, SQLite, ffmpeg, TensorFlow.js, WebSockets, Cloudflare R2, Xendit, Railway

WhiteLabelAI | *SaaS Platform · Multi-Tenant, AI-Powered*
White-label AI chatbot platform for agencies. Bots are custom-trained on PDFs, text, or scraped URLs, then deployed as embeddable widgets or Facebook Messenger integrations. Multi-tenant, with JWT auth.
Stack: Next.js, Express, Supabase, Claude API, Facebook Graph API, Railway

Dark Sync | *Management System · Web + Desktop + Mobile*
Internet cafe management system covering QR member registration, session tracking, point-of-sale, food ordering, tournaments, analytics, and P&L reporting. One codebase ships as web, Electron desktop, and Capacitor mobile.
Stack: React, Express, SQLite, Socket.io, Electron, Capacitor

ForgeAI / AgentForge | *AI Automation · Cold Email Outreach* forgeaiagent.com
Automated outreach for agencies. Scouts leads by city and business type, uses AI to write emails grounded in each prospect's own website content, sends them, and manages follow-up sequences.
Stack: Node.js, Claude API, Google Places API, Railway

Job Finder | *AI Chrome Extension · Job Matching*
Chrome extension that scans job boards, scores listings against the user's skills with AI, and drafts tailored application messages for review before sending.
Stack: Chrome Extension, Next.js, Claude API, Railway

H.U.B: Hanap.Usap.Build | *E-Commerce · 150+ Products* www.hanapusapbuild.store
PC builder storefront with a 150+ product catalog, GCash and bank checkout, delivery integration, and customer accounts. Built from scratch, no templates.
Stack: HTML/CSS/JS, GCash, Inventory Management

DCTE: Davao Computer Trade-in Express | *E-Commerce · Live Store* dctestore.com
E-commerce platform for a PC shop with a catalog, cart, payments, loyalty rewards, and a trade-in value estimator for used hardware.
Stack: HTML/CSS/JS, E-Commerce, Payments, Loyalty System

Pickleball Court Booking: court reservation platform with real-time availability, online booking, and a management dashboard.

DLVASolutions: agency site for web development, AI automation, and VA training. Hand-coded from scratch. dlvasolutions.com

EDUCATION

BS Information Technology | Ateneo de Davao University *2016 – 2020*
Coursework in programming, networking, database management, and information systems; completed a capstone system.
